

**IN THE SPECIFICATION**

Please amend paragraph [00028], on page 7, as follows:

[00028]       The curable liquid electrolyte can further include a solvent, such as water, or a dimethyl acetamide. The curable liquid electrolyte can also optionally contain a photo-initiator or an ~~elasticizing~~ elasticizing agent, such as ~~acrylonitrile~~ acrylonitrile.

Please amend paragraph [00035], on page 8, as follows:

[00035]       In yet another embodiment, the method can include the step of adding an ~~elasticizing~~ elasticizing agent, such as ~~acrylonitrile~~ acrylonitrile, to the curable electrolyte solution to reduce brittleness.
